Central University of Tamil Nadu  
Department of Economics

Two-Day Workshop on Research Methodology  
(07 – 08 December 2018)

Research Methodology is the central and most crucial component in any research endeavour. A researcher should have thorough understanding of tools and methodology used in research in order to operationalize research work. Understanding and applications of both qualitative and quantitative techniques in research are not only required for scientific analysis, but also significantly affect the quality output of research.

In recognition of the need for orienting and upgrading the research skills of research scholars and master students, the Department of Economics, Central University of Tamil Nadu is organising a two-day training course on Research Methodology during 7th to 8th December 2018.

Objectives and themes of the workshop:

- The main objective of this workshop is to orient students the basics of research methodology.

- The course largely covers the topics such as research design and formulating research problems, research questions, formulation of hypothesis, exploring data sources, data collection methods, data analysis techniques and various aspects related with report writing.

- The course also includes an orientation on use of data both qualitative and quantitative techniques in analysing data.
