

## Nature Ranked the Chem CUTN as 55<sup>th</sup> in the academic research category

That's great news!

The Department of Chemistry, Central University of Tamil Nadu, Thiruvarur has achieved an impressive ranking of **55th** in the academic category according to the Nature Index annual table for 2023. The Nature Index is widely recognized as a competitive and prestigious metric for evaluating the performance of institutions and countries in scientific research. It serves as a significant benchmark for assessing research output and impact on a global scale.

Ranking high in The Nature Index is a testament to the department's dedication and excellence in scientific research. It indicates that the department has demonstrated exceptional performance and made significant contributions to the field of Chemistry. This achievement highlights the department's commitment to producing high-quality research and its impact on the scientific community.

Such recognition can bring numerous benefits to the department and the university. It can attract talented researchers, students, and collaborators worldwide, leading to enhanced research collaborations and opportunities for scientific advancements. Furthermore, it can also strengthen the department's reputation, increasing its visibility and credibility within the global scientific community.

***Congratulations to the Department of Chemistry, Central University of Tamil Nadu, for this remarkable achievement in The Nature Index!***
