Invitation For Departments' First Alumni Virtual Meet-2022

Minutes of The Alumni Meeting

The Department of Statistics and Applied Mathematics organized its first alumni meet virtually via the Google meet platform on October 20 (Thursday), 2022 to create a strong chain using all of its alumni as links and to maintain healthy relations between the department and its alumni.

Google meet link: <https://meet.google.com/msu-axkn-muy>

A total of 38 members, including the faculty of the department, participated in this virtual alumni meeting. This virtual gathering is only for all former students from the 2019-2021 and 2020-22 batches, as well as students from the current batch.

This meeting started at 6:00 P.M., IST with an introduction speech by the department's alumni coordinator, Dr. D. Narsimhulu. He warmly welcomed and greeted all former students (alumni) and conveyed the introductory remarks in which he asserted the importance, purpose, and goal of alumni in an institution or university. He also said that this day will be remembered for a lifetime. We can recollect the memories of using this virtual meeting again.

He also praised the multiple roles played by some of the alumni who are working as analysts, IT support engineers, system engineers, probationary officers, assistant professors, and lecturers, while also pursuing higher education in various institutions/universities across the country. He also elaborated on the purpose and importance of the Central University of Tamil Nadu Alumni Association (CUTNAA).

The present batch of students in the department is excited to see all the seniors and super seniors at the same time. Later, Alumni members shared their memories and experience with the current batch of students, during their M.Sc. period and after their completion of post-graduation at the Central University of Tamil Nadu (CUTN) and after their completion of postgraduation. They also shared their struggles and tips to overcome various academic and non-academic activities.

First batch alumni members Meghana D, Abhinaya G K, and Sandeep Kumar recollected their memories and how their time spent on the campus of CUTN will always be their most treasured memories. Meghana D, the Analyst, said that skills and communication are the two aspects that a student should learn while pursuing his/her masters. There must be a balance between these two qualities; otherwise, you can't even survive in this competitive world. If you need a job, these are the two qualities that the corporate world expects how their company employee should be. Abhinaya G K pointed out missing offline classes due to the COVID-19 pandemic

situations. Mr. Sandeep Kumar, the lecturer, said the importance of teacher's role in society and also shared his learning and studying experience during the period of postgraduation level.

From the second batch of alumnus members, Sivalingam SM, a Ph.D. student at NIT Kalidcal, shared his memories, and his present research experience. He also said that hard work is necessary, but it also takes smart work to be successful in making your own choices, acting smart, and making decisions bravely. If you shine, our department will automatically shine too.

They also recommended different career opportunities in various industries as well as higher education to the current cohort of batch students. Finally, they also conveyed and extended gratitude to those who organized today's virtual alumni meet.

Present batch students, Induchoodan. R and Alka Kumari conveyed felicitations, which were followed by a beautiful music performance by Anjana Jomon and M. Athira.

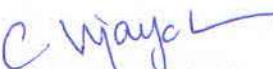

Our faculty members also recollected their flourishing memories of the alumni members, and also conveyed their best wishes ahead, and also blessed them to stay strong, and gave them an assurance that "The gates of CUTN are always open for them and you are always welcome."

Later, the Head of the Department, Dr. Deepak M. Sakate, addressed the virtual gathering. He explained the development of the department and its activities to our alumni. He is glad that our alumni present here is in a good position. He motivated the present batch of students to use the department to shine, rather than regret it like our alumni and master's graduate. He quoted that the students of department's success are our department's success.

We ended the session with an acknowledgement from the departmental alumni coordinator, who thanked all dear alumni for their support and participation in making this event a success, and for the opportunity. Let's stay connected.
